

LOKESH DIPAK AHIRE

Aspiring Software Developer | Nashik, Maharashtra, India 422001

+91 9579329098 | lokeshahire85@gmail.com | [linkedin.com/in/lokesh-ahire](https://www.linkedin.com/in/lokesh-ahire) | github.com/luckyyyy08

PROFILE SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications using PHP (OOP), JavaScript (ES6+), and MySQL. Completed software engineering simulations with JPMorgan Chase and Deloitte, gaining exposure to REST APIs, real-time data streaming, and enterprise architecture design. Built and deployed five end-to-end projects spanning e-commerce, dashboards, and automation tools. Seeking an entry-level Software Developer role to apply strong fundamentals in algorithms, databases, and web technologies.

EDUCATION

KTHM College, Nashik (Savitribai Phule Pune University) 2023 – 2026

Bachelor of Science in Computer Science | Nashik, India

- Relevant Coursework: Data Structures, DBMS, OOP, Software Engineering, Web Technologies

EXPERIENCE

Software Engineering Virtual Experience Program — JPMorgan Chase & Co. (Forage) May 2026

Remote

- Completed hands-on software development tasks simulating real-world engineering workflows at JPMorgan Chase
- Implemented project setup and developed REST API controllers for backend integration
- Gained practical experience in real-time data streaming and database management using Kafka and H2 database

Technology Job Simulation Intern — Deloitte (via Forage) May 2026

Remote

- Completed a virtual job simulation focused on technology consulting and development tasks
- Analyzed technical requirements and proposed architectural solutions for enterprise systems
- Simulated real-world developer workflows including code reviews, documentation, and system design

PROJECTS

GramSetu Rural-Tech Platform | PHP OOP, MySQL, JavaScript, Bootstrap 5 Jan 2026

- Built a rural governance platform using PHP, MySQL and Bootstrap.
- Designed citizen/admin dashboards improving request tracking workflow.
- Implemented database modules for complaints, certificates and services.

CleanBox AI | PHP OOP, MySQL, Gmail API, Google OAuth Mar 2026

- Developed an inbox-decluttering system using the Gmail API to automate deletion of promotional and expired emails
- Implemented OAuth 2.0 for secure login and built a space-recovery dashboard using Chart.js

CakeCraft E-commerce | PHP, MySQL, Bootstrap 5 Nov 2025

- Created a full-stack e-commerce catalog with filters, cart, checkout, and an admin statistics dashboard
- Automated order status records and database logs to streamline shop tracking operations

TECHNICAL SKILLS

Languages: C, C++, Java, JavaScript, PHP, SQL

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: PHP OOP, REST API, MySQL

CERTIFICATIONS & ACHIEVEMENTS

- Full Stack Web Development — Comprehensive certification covering modern web standards (Udemy)
- PHP & MySQL Mastery — Specialized training in backend architecture and database security
- Final Year Project Excellence — Recognized for architectural design of the GramSetu platform
